Portfolio: <https://catayongportfolio.vercel.app/> • **LinkedIn:** www.linkedin.com/in/bejaycatayong

EDUCATION

Jose Rizal University

Bachelor of Science in Information Technology

Graduated: June 2026

Mandaluyong City

WORK EXPERIENCE

Cornersteel Systems Corporation

Web Development

January 2026 - April 2026

Mandaluyong City

- Developed responsive web pages using React, TypeScript, Tailwind CSS, and Sass, utilizing Vite & Next.js for optimized development builds adhering to MVC structure.
- Created 15+ reusable UI components with ShadCN, maintaining design consistency and reducing front-end development time by 20% for subsequent pages.
- Optimized application loading speeds and cross-browser compatibility by implementing lazy loading and image optimization, improving Core Web Vitals (LCP) by 15%.

PROJECTS

Geo-Tagging for Efficient Solid Waste Monitoring in CEMD

Project Manager / Full-Stack Developer

March 2025 - November 2025

<https://github.com/jaycatayong30/newBTD>

- Architected a geo-tagging solution to automate solid waste monitoring for the Mandaluyong City Environmental Management Department.
- Implemented automated tracking features that significantly reduced manual data entry errors and improved operational oversight.
- Collaborated with stakeholders to refine project requirements, ensuring alignment with organizational goals and user needs.

Local Sendy

Developer / Contributor

February 2026 - April 2026

<https://github.com/jaycatayong30/Local-Sendy-v1.git>

- Developed a local-first, peer-to-peer file-sharing app using React, Node.js, and Socket.IO to enable instant, zero-configuration device discovery and transfers.
- Engineered a chunked file-streaming system supporting transfers up to 2GB with real-time progress updates and disconnect-aware state management for high reliability.
- Implemented low-latency real-time features including QR-based onboarding, clipboard synchronization, and transfer lifecycle notifications.

pa-Queue

Developer / Contributor

February 2026 - April 2026

<https://github.com/jaycatayong30/pa-Queue-server>

- Engineered an interactive, real-time event music queueing system that integrates seamlessly with the Spotify Web API to streamline party music management.
- Developed host and guest interface workflows featuring QR code room access, search functionality, and live song submission features without requiring guest authentication.
- Implemented host control controls for real-time queue curation, enabling efficient approval workflows and instantaneous playback synchronization to enhance guest engagement.

SKILLS, CERTIFICATIONS & AWARDS

- **Technical:** HTML5, CSS3, Sass, JavaScript(ES6+), TypeScript, React.js, Vue.js, Next.js, Vite, Tailwind CSS, PHP, Node.js, MySQL, MongoDB, Supabase, SQL, Git/GitHub, WebPack, Gen AI Prompt Engineering, Machine Learning, Debugging & Testing.
- **Certifications:**
 - Frontend Development Libraries (React) – freeCodeCamp (2026) - **Currently Taking**
 - IT Specialist in Databases – Certiport (2023)
 - Machine Learning Certification – AI Singapore (2025)
 - NCIII Training in JAVA Programming – JRU (2023)
 - Job Ready Employability Skills – Wadhwani Foundation (2026)
- **Awards:** 3rd Place, CSE Week 2026 Research Colloquium | Jose Rizal University (April 2026)
